The Wm. Powell Company
Dependable Engineering Specialties
Cincinnati, Ohio.

TRAHERN PUMPS

THE NEW COMBINED HAND AND WIND MILL FORCE PUMP

Fig. 73 represents our new force-pump. This pump we claim to be the most complete and finely finished force-pump on the market. It is furnished with detachable faucet spout, which by a moment's work can be replaced by the straight spout.

Another new feature of this pump is the brass thumb-screw in air-chamber. When using this pump with hose, screw down the thumb-screw to prevent air from escaping, and when used without hose loosen it.

The thread on end of faucet is cut to fit 1-inch hose coupling.

This pump is furnished with our patent cap, has turned and polished piston-bar, nicely fitting brass stuffing box, and is in every way complete.

We can furnish this pump with adjustable-stroke cap, when ordered.

When ordered for tubular well purposes, we fit these pumps for 10-inch stroke, and tapped for 2-inch pipe, with slide-bar forked to receive wood-rod.

List of Standard

10-inch stroke \$12.00

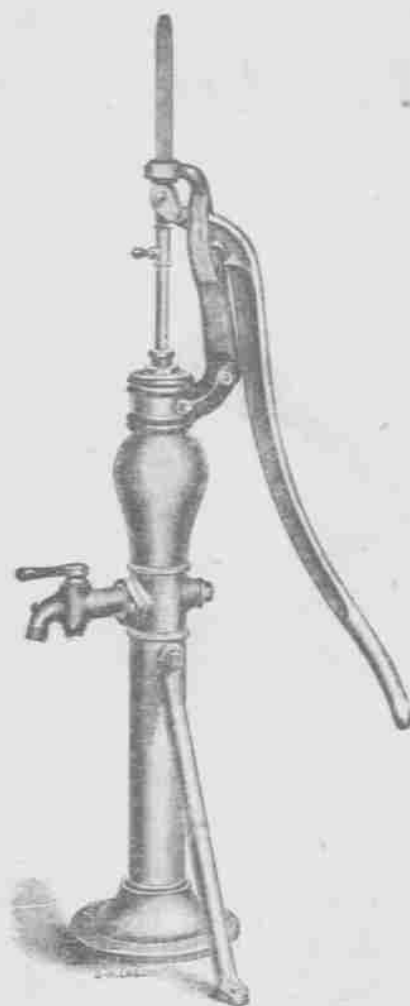

Fig. 73

TRAHERN TANK PUMP

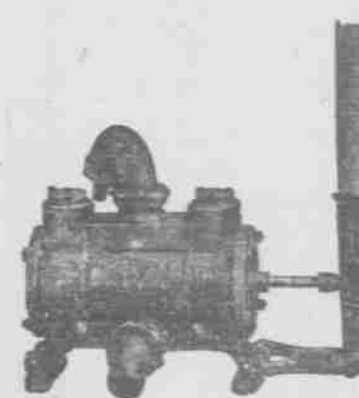

Fig. 200 Trahern Double Acting Thresher Tank Pump is especially adapted for filling tanks, washing boilers, in fact, for any use where a large quantity of water is required.

Fitted with 2-inch suction Rubber faced valves, Rubber packed heads, and has a capacity of 2 1-2 barrels per minute.

Has a detachable wood handle, which can be attached to either end of pump as heads are reversible.

The metal discharge valves rest on raised brass valve seats and are accessible by removing caps at top of pump.

The check valves are seated in like manner and are accessible by removing either head. Is anti-freezing and with all a simple, compact and durable pump.

DESCRIPTION

Diameter Cylinder	Stroke	Suction	Discharge	Price
No. 200 5-inch	5-inch	2-inch Hose and 2-inch Pipe.	1-inch Hose or 2-inch Pipe.	\$12.00
